## PROFESSIONAL SUMMARY

Python Full Stack Developer and B.Tech Computer Science graduate (2026) with hands-on experience building RESTful APIs with FastAPI, SQLAlchemy and Pydantic, securing them with JWT authentication, and connecting them to React.js front ends. Currently interning at A2R Software Consulting, developing and integrating database-backed REST APIs across Python, Node.js/Express.js and React.js. Built 3 projects, including an 18-endpoint food-delivery backend on SQL Server and a deployed real-time chat application with JWT authentication.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript (ES6+), TypeScript, SQL
**Backend & APIs:** FastAPI, RESTful API Design, Node.js, Express.js, SQLAlchemy (ORM), Pydantic, JWT Authentication, bcrypt, Socket.IO
**Databases:** Microsoft SQL Server, MySQL, MongoDB
**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, TanStack Query, React Hook Form
**Tools & DevOps:** Git, GitHub, Docker, Postman, Swagger/OpenAPI, Vite, VS Code
**Core Concepts:** OOP, CRUD Operations, API Validation, Exception Handling, Modular Design, Debugging, Pandas, NumPy

## PROFESSIONAL EXPERIENCE

**Python Full Stack Developer Intern, A2R Software Consulting** **Jun 2026 – Present**

- Build and integrate RESTful APIs in Python with request validation and database-backed CRUD operations, verifying every endpoint with Postman.
- Deliver full-stack features with Python, React.js and Node.js/Express.js, connecting front ends to REST APIs that exchange JSON.
- Debug and resolve front-end, back-end and API-integration issues; collaborate with the team through Git and GitHub.
- Apply OOP, modular design and exception handling in Python; clean and validate datasets with Pandas and NumPy.

## PROJECTS

**Momato: Food Delivery Backend API** *(In Development)* GitHub
*Python, FastAPI, SQLAlchemy, PyODBC, SQL Server, JWT, bcrypt, Pydantic*

- Building a RESTful backend with 18 API endpoints across 5 SQL Server tables using FastAPI, SQLAlchemy and PyODBC.
- Implemented customer registration and login with bcrypt password hashing and JWT authentication.
- Built CRUD APIs for restaurants, food items, user profiles and cart management; validated requests and responses with Pydantic schemas; documented and tested with Swagger/OpenAPI and Postman.

**Chatty: Real-Time Chat Application** Live Demo | GitHub
*React.js, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS*

- Built and deployed a full-stack chat app with real-time one-to-one messaging over Socket.IO and live online-user status.
- Stored conversations in MongoDB; secured the app with JWT authentication and protected routes; added profile editing with image upload.
- Designed a responsive React.js and Tailwind CSS interface with profile and settings pages.

**WanderFitWealth: Responsive Web Application** GitHub
*React 19, TypeScript, TanStack Start, Tailwind CSS*

- Built and deployed a responsive multi-page web platform covering travel, health and wealth, using React 19 and TypeScript.
- Developed reusable UI components; managed client-side data with TanStack Query and forms with React Hook Form validation.
- Configured build and deployment with Vite, Bun and Cloudflare Workers.

## EDUCATION

**B.Tech, Computer Science & Technology** **2022 – 2026**
*Trident Academy of Technology* Bhubaneswar, Odisha

**Intermediate (Higher Secondary)** **2022**
*Christ College* Cuttack, Odisha

## CERTIFICATIONS

**The Complete Full-Stack Web Development Bootcamp**, Udemy (Dr. Angela Yu) Jan 2025
